

### **Update 16.04.2020 – Advice for Transport Businesses and shared car journeys**

Our Friends at the **NBRA** featured some great advice from Public Health England for travelling in your car with others when there is no other alternative, we thought we'd share...

If workers have to share enclosed spaces such as the cabs of vehicles, they should keep the window open for ventilation and they should be careful to avoid touching their face at all times. On leaving the enclosed space, they should wash their hands with soap and water for 20 seconds or more or use hand sanitiser when they cannot wash their hands.

For the use of private vehicles or when car-pooling, if the journey is essential, such as travel to work, and there is no option but to share a car with people who are not part of the same household, journeys should be shared with the same individuals and with the minimum number of people at any one time.

**Good ventilation** (i.e. keeping the windows open) and facing away from each other may help to reduce the risk. Private vehicles that are used by people from multiple households should be cleaned regularly using gloves and standard cleaning products with particular emphasis on handles and other areas where passengers may touch surfaces.

This is a difficult time for everybody, and as we are open supporting critical services to stay on the road. We are here for everyone, Stay Safe
