

**Update 30.03.2020**

### **We're still virus free at Fleetline with 0% infections**

Good news at the start of this second week of restrictions is that we remain virus free... Seems our stringent measures, such as strict social distancing, keeping the work bays 10m apart, monitoring staff temperatures, putting all breaks on a rota, and keeping all customer facing areas clean and sanitised to keep this virus at bay are working

Fingers crossed it stays like this

We've learnt that following to the government's advice and sticking to our own procedures to the letter, is a positive thing for all...

### **The Fleetline Team**
